MPILLUMINATION
MARINOS PATRIKIOS ARCHITECTURAL LIGHTING

CEILING MOUNTED AND DOWNLIGHTS

Downlights and ceiling mounted luminaires are available in different shapes, as parallelogram, round, square, and versions, as movable or fixed, thus they offer a variety of implementations in general and decorative lighting.

MP ILLUMINATION

MARINOS PATRIKIOS ARCHITECTURAL LIGHTING

MP ILLUMINATION - MARINOS PATRIKIOS, specialises in designing, manufacturing and producing indoor and outdoor architectural lighting fittings and luminaire systems. Operating since 1973, the company's successful progress lies in the excellent knowledge of lighting technology, the use of high-engineering performance and safety standards, and the modern aesthetic designs.

The lighting fittings of MP ILLUMINATION are manufactured, checked and tested in compliance to the general standard of the European Union for lighting fittings EN-60598 and they are CE marked on their bodies and packing boxes. The safety testing of MP's lighting fittings were carried out at EL0T testing laboratories. Furthermore, MP ILLUMINATION

is certified with ISO 9001 from DQS GERMANY, for the quality management system processes and internal activities. Moreover, the company offers the possibility of OEM services, by producing special lighting fittings according to customer's needs.

MP ILLUMINATION promotes its ecological conscience and invests in energy saving technologies. MP is a shareholder of FOTOKYKLOSI S.A., a recycling company for lighting fittings and lamps approved by the MINISTRY of ENVIRONMENT & ENERGY.

The company's central offices, showroom and factory are situated at Skaramangas Industrial area, very close to Skaramangas shipyards, in privately owned premises of 7.000m².

WHO WE ARE

TRACKLIGHT

Track lighting fittings are attached anywhere on a continuous track device and produce a wide or narrow light effect according to the beam angle. Track lights are available in a broad variety of models, are suitable for many lamp types and are offered with or without incorporated ballast.

waterproof projectors for outdoors use
decorative wall fixed waterproof fittings
garden lights
street lights
waterproof ground buried fittings
led lights
lighting fittings for T5 fluorescent lamps
downlights for PL & HQI lamps for indoors use
pendant lights
appliques recessed or external
projectors for indoors use
tracklights
spotlights for ceiling and concrete constructions
marine lighting fittings for use at ships, yachts, shipyards
special products on customer's design (OEM)

WHAT WE DO

MADE IN GREECE

GARDEN LIGHTS

Luminaires of this type are mostly used for lighting corridors, walkways, gardens, houses, shops, shopping centers, and building surrounding areas. They are available in various body heights and are suitable for many lamp types. Use of special lenses or led lighting systems result to a narrow or wide beam lighting effect, producing a remarkable lighting output.

LIGHTING DESIGN & ENGINEERING

MP ILLUMINATION's R&D Department of Architectural Lighting Fittings is consisted of engineers and designers following a 5 phase process:

- Schematic Design.
- Design Development.
- Technical Documentation.
- Quality Control Tests
- Implementation

Even though lighting technology is fast-paced and new developments are introduced a few times each year, in every phase of the process MP's experts apply all latest principles of qualitative and safe lighting engineering.

PROJECTORS

Waterproof decorative projectors are suitable for lighting building facades, shops, houses, gardens, public areas, and other surrounding areas. According to their beam, they offer general lighting or spot lighting for highlighting architectural details.

LIGHTING STUDY & CONSULTING

MP ILLUMINATION's Lighting Design team provides unique lighting studies, in addition to energy saving and consumption reduction proposals. MP's design team is specialized in interior and exterior lighting designing and consulting.

FRAMELESS

Frameless lighting fittings are made of plaster or die cast-aluminum. Their competitive advantage is that instead of being independent and obvious objects, they become part of the false-ceiling, creating minimal aesthetic result.

LED LIGHTING

LED technology is used in a wide range of luminaires in order to maximize energy saving, without reducing luminous efficiency. The latest led modules are very powerful, ensure long-life duration without the need of continuous service and potential recycling.

THINK GREEN CHOOSE ECO LIGHTING

Our prime principle is to design and develop lighting fixtures of high quality standards that incorporate energy saving lamps and latest LED technologies, aiming towards reduction of power consumption and promotion of environmental protection.

EXPLORE OUR PRODUCTS

LEARN MORE ABOUT OUR WORK

- 7.000m² OF PRIVATELY OWNED FACTORY PREMISES
- MORE THAN 2.000 UNIQUE PRODUCT CODES
- CUSTOM-MADE DESIGN SOLUTIONS

MP's production line consists of more than fifteen categories that cover the complete range of indoor and outdoor luminaires, ideal for every demanding application, such as company offices, commercial centers, museums, airports, hospitals, public buildings, hotels, educational institutions, modern residences, public spaces, streets, ships, factories.

- AL AIN SCHOOLS - UAE
- FUTURE SCHOOLS - UAE
- AL AIN STADIUM - UAE
- SCHOOLS PROJECT - DENMARK

WALL FIXED & GROUND BURIED

Waterproof fittings of this category are installed at verandas, corridors, external walkways and any type of building facades, either in recessed or external versions. They are mainly produced from die-cast aluminum, brass or inox stainless steel and they are available in a wide range, suitable for direct or indirect lighting, as well as for darklight output.

FLUORESCENT

The luminaires of this category diffuse general light into the space and are used in commercial places, working or storage spaces, showroom areas as well as public areas. They are installed as wall-fixed, ceiling mounted, pendant, downlight or uplight fittings.
