

MP ILLUMINATION

MARINOS PATRIKIOS ARCHITECTURAL LIGHTING

LIGHTING

KNOW HOW

SINCE 1973

MP ILLUMINATION MARINOS PATRIKIOS

manufacture and customize architectural indoor and outdoor lighting fixtures since 1973.

Our continuous evolution is based on the excellent knowledge of lighting technology, the use of high-end engineering, the application of safety standards and the modern aesthetic designs. **Mp Illumination** designs and manufactures architectural lighting according to the latest developments and technological achievements.

Our partners-suppliers are international market leaders and trend setters and we make sure our products incorporate high-end elements, whereas our clients are top lighting projects companies, architectural companies and engineers internationally recognized.

Our production line consists of a variety of categories, and covers the complete range of indoors and outdoors luminaires, ideal for every demanding application, such as company offices, commercial centers, museums, airports, hospitals, public buildings, hotels, educational institutions, modern residences, public spaces, streets, ships, factories.

Our central offices, showroom and factory are situated in Athens, at Skaramangas industrial area, in privately owned premises of 7.000 m².

50 YEARS OF EXPERIENCE

Over the last 50 years in lighting business we acknowledge that the key of success is based on some important values:

- professionalism
- attention to detail
- flexibility
- service
- speed
- consistency

Our philosophy is based on these values and has led us to build strong partnerships through the years.

ANNIVERSARY
YEARS
50 OF LIGHTING
EXPERIENCE

ISO 9001

MP ILLUMINATION has been certified with ISO 9001 from DQS Germany, for the quality management system of its internal processes. We use quality management systems to meet the exact requirements of our customers.

Our quality management practices incorporate a comprehensive set of guidance documents and traceability tables to ensure quality.

Lighting Studies & Planning

Our Lighting Design team provides to our clients unique lighting calculation and photometric studies.

Combining extensive product knowledge with a wide range of energy efficient product solutions our Lighting Design team is able to guide you through a cost-effective and sustainable selection process, without compromising in quality or lighting result.

Global presence & exports

MP ILLUMINATION is continuously expanding its global presence and is ready to provide its customers excellent service and collaboration.

With a presence in more 40 countries, all over the world, **MP** is definitely a very credible and competitive partner for all your projects.

Our dedication to service and technical support guarantees that every customer will get personalized attention and service at any stage of a project, as well as constant technical support.

Commitment to Quality

Every step in the production process has a routine quality procedure, covering both product quality and testing. Each product that leaves MPILLUMINATION, has been inspected and tested thoroughly, resulting in maximum efficiency.

The lighting fittings of **MP ILLUMINATION** are manufactured, checked and tested in compliance to the general standard of European Union for lighting fittings EN-60598 and they are CE marked on their bodies and packing boxes.

100% Greek Products

The production process is conducted in our privately owned premises in Athens: from manufacturing and assembling to wiring and final testing. We don't just assemble the luminaires but we carry out the whole process from R&D stages to final product. This allows us to make prototypes and made-to-measure fixtures rapidly and with excellent quality standards. This is one of our strong competitive advantages in the international market.

Advanced Solutions

Dim to Warm

1800K 2200K 3000K

Human Centric lighting
Tunable White Led sources

Special Constructions

We are able to offer special lighting solutions according to the needs and requirements of each project.

We have all the tools to do so. Technical skills, intelligent innovation and manufacture knowhow enable us to respond to your requirements in a short time. We are on your side, as we have the resources and experience to manufacture quality customized solutions to order.

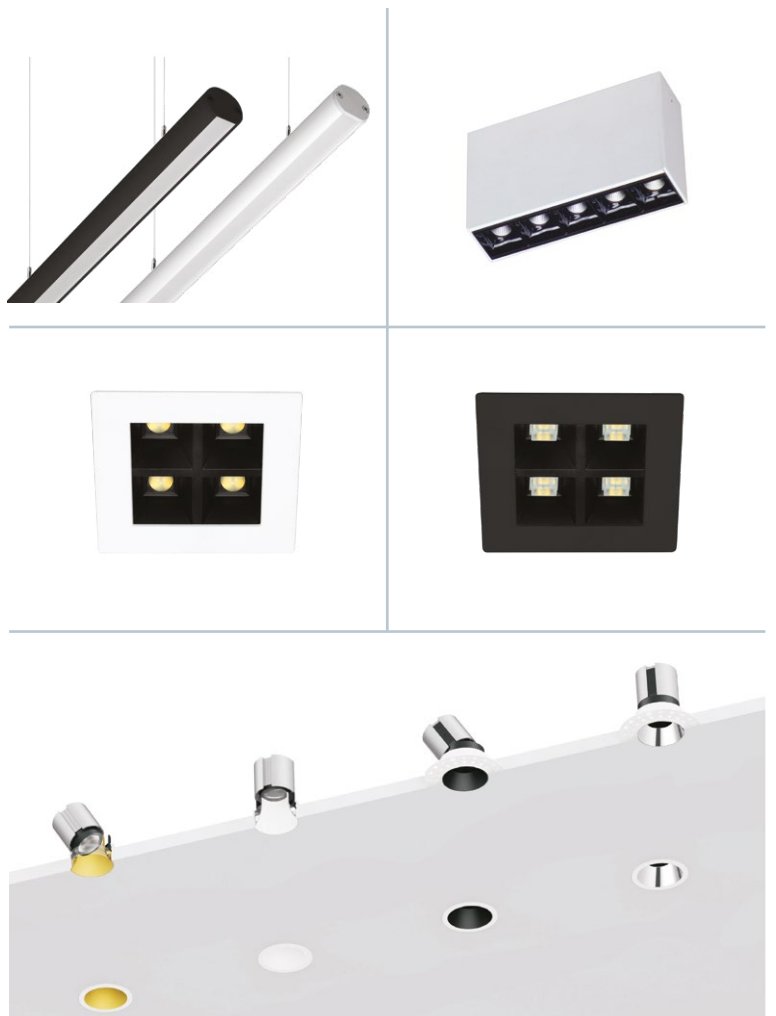

Design

When we design & develop our new collections, we are inspired by trends in architecture, we are driven by the progress of technology and we are focused on the international markets' needs.

LED Technology

We follow up the constantly evolving LED technology. We believe and invest in new technologies, so much that today more than 99% of the full range is available in LED version. Thanks to technology progress the latest led modules are very powerful and ensure better efficiency, lower consumption, higher reliability and long life duration.

The high quality of LEDs supplied in our luminaires, combined with high efficiency lenses, reflectors and optical systems, provide a great lighting distribution variety suitable to create any lighting effect.

High End products

Our luminaires are manufactured with the goal of lasting over time and ensuring constant performances.

We use high quality aluminum alloys, as well as brass and stainless steel materials, to make sure that our products resist harsh environmental conditions.

We select only the highest grade of components and we design their integration within our luminaires using our many years of experience and technical expertise.
